

CALIFORNIA TIGER SALAMANDER

Terrestrial Ecology Workshop

FRIDAY
MARCH 24, 2017

LAGUNA ENVIRONMENTAL CENTER
SANTA ROSA, CA

- Herpetologists Dave Cook and Jeff Alvarez will review the biology, habitat, and migration patterns of CTS.
- The design of roadway tunnels, pitfall trap arrays and monitoring land use management practices will be discussed along with USFWS and CDFW survey protocols. A hands-on experience portion of the workshop will include constructing a pitfall trap and fence array. Field trip portion will include CTS tunnel systems along roadways.

- This one-day workshop is designed to provide practical training to professional biologists, resource managers, and students on the terrestrial ecology, land use management, and regulations of the California tiger salamander (CTS).
